FISH & CHIPS  
Hale

Our Fish and Chip Shops are family run by four brothers & sisters, Alison Mattravers, Christopher Pittaras, Michelle Pittaras and Robert Pittaras. Our family has over 30 years in the Fish and chip shop industry. Christopher is mainly based at the Brook road shop and Robert at the Hale shop, Alison and Michelle work between the two. We have been managing Brook road for the past three years and Hale the past one year as a family, prior to which we rented the shops out.

Recently both shops came in the top three in "The best Fish and Chip shop in Trafford Awards". Lots of people didn't realise when they were voting for the separate shops that the two were linked. With our customers voting for us in such high numbers this gave us the confidence we needed to finally change the names. We have created our own fresh image and hopefully this is the start of us building a chain of shops. We are very ambitious and are keen to keep moving in an upwards direction. We decided on the name "the good catch" as we feel we are just that! We wanted to let all

our customers know that the shops have not changed hands or management with the new name. Everything is still the same, both shops use the same quality of food, have the same menu, prices and work exactly the same.

We have also joined the Hugh Fearnley/Whittingstall fish fight campaign [www.fishfight.net](http://www.fishfight.net). The food that we offer is of top quality, we never compromise on quality. Our fish is delivered fresh every morning, we pay extra for the finest quality of fish. We don't settle for second best, if we receive anything below our standards it simply gets sent back. We cook our fish to order and fry our chips in smaller quantities more often to ensure that your food is always fresh. We believe this is the reason why our shops are so popular and our customers keep coming back to us. We offer a wide variety of sustainable fish, for example mackerel and hake, also and our delicious home made fish cakes are made with sustainable fish.

We are very keen on going green where ever we can. We have invested a lot of money in new high efficiency ranges.

We use 100 % vegetable Green Palm oil

because it has the Green Q stamp which ensures us that rain forests aren't being cleared for palm oil plantation. This oil is recognised by the National Federation of Fish Fries to be one of the the greenest oils around. We also use brown paper bags which are far more environmentally friendly than plastic and they preserve the food much better than the plastic bags when taken from the shop home. We recycle everything from our box's, to our oil and pie foils. We send everything off to companies who can recycle and then use on.

The staff that we have are a credit to us and they work very hard. We pride ourselves on the quality of our food and on the speed and efficiency of our service. Lots of our Customers compliment us on the speed of our service and at how quickly the queue moves, especially on our busy nights when we have upto 6 staff helping each other serving at the same time. We would like to thank all our loyal customers for their continued support and custom.
